Technical Skills

Languages: C++, TypeScript, JavaScript,, HTML, CSS, Python(Beginner)

Core CS: Data Structures & Algorithms, Object-Oriented Programming

Problem Solving: 164+ DSA problems solved on LeetCode

Frontend: Next.js, React, Tailwind CSS, GSAP

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, SQL

Tools: Git, GitHub, GitHub Actions, Azure

AI-Assisted Development: GitHub Copilot, Claude, ChatGPT

Work Experience

Full Stack Developer Intern - PaySecure - regal-toffee.netlify.app **Nov 2024 - Jan 2025**

- Increased backend test coverage from 60% to 66% using **Jest**, reducing the number of regressions found during release testing.
- Identified and resolved authentication, validation, and API handling defects, improving application reliability and reducing recurring issues.
- Refactored **Node.js** and **Express** REST APIs, reducing average response times by **10%** and improving backend maintainability.
- Developed responsive React dashboards adopted by multiple internal teams for monitoring operational workflows.
- Collaborated with **3+ engineering** teams Agile sprint planning, code reviews, and feature estimation, accelerating delivery timelines.

Projects

Bookified - Next.js, GitHub Actions, Azure App Service - books-store-eight-delta.vercel **Apr 2026 - May 2026**

- Architected a full-stack **RAG** application that transforms uploaded PDF books into searchable knowledge bases with voice-driven interaction.
- Implemented a PDF processing pipeline using **pdfjs-dist**, **MongoDB text search**, and **Vercel Blob Storage** to extract text, create searchable content segments, and manage book metadata and voice session history.
- Configured **Azure App Service** on Linux with Node.js 22 runtime, custom startup command, and environment variables for MongoDB, Clerk, and Vercel Blob across staging and production slots.
- Authored a **GitHub Actions** CI/CD pipeline with lint, type-check, and build stages that triggers on push to main and deploys the Next.js build artifact to Azure App Service via publish profile.

QuickChat - React, Node.js, MongoDB, Socket.IO, JWT - chat-app-ashen-chi.vercel.app **Dec 2024 - Jan 2025**

- Launched a full-stack **real-time messaging platform** handling **50+ concurrent users** with sub-second delivery.
- Secured **50+ accounts** through **JWT-based authentication** and role-restricted routing.
- Processed **100+ daily API operations** with tuned **MongoDB queries** and structured REST design.
- Integrated **200+ media uploads** by integrating **Cloudinary** with optimized payload handling.

Food Mart - React, Firebase, Redux Toolkit - github.com/AkshJ2004/Food-Mart.git **Sep 2024 - Oct 2025**

- Shipped a Swiggy-style food ordering platform listing **10+ restaurants** via live API consumption.
- Lowered API fetch latency by **25%** through caching layers and request optimization.
- Orchestrated global state with **Redux Toolkit**, sustaining **50+ simulated concurrent sessions**.
- Optimized mobile performance by minimizing layout reflows and tuning responsive breakpoints.

Education

Vellore Institute of Technology

B.Tech in Computer Science — CGPA: 7.82

Sep 2022 - Oct 2026

Certifications and Achievements

MongoDB Certified Associate Developer - MongoDB, Inc. (2025)

Adobe India Hackathon Semi-Finalist Built a real-time image compression system improving efficiency by 40%

National Mathematics Talent Contest Winner

Active Open-Source Contributor – 14+ public repositories on GitHub projects
